

LONG LENGTH PANELS

CEDARWAY[®]

PREMIUM

The handcrafted allure of real split cedar is lovingly captured and enhanced by Cedarway, the industry's finest cedar shake replica that brings interest, value and prestige to homes of every size and style.

FINALLY, A SHAKE PANEL DONE THE CEDARWAY!

- Polypropylene injection molded color throughout panel
- Single course 8' construction, .090 thick with positive locking tabs, seamless installation and Scrap Saver cut lines
- Installs up to 30% faster than conventional shake panels on walls with multiple windows & doors
- 5% or less scrap rate
- 220-mph wind tested
- Won't warp, rot, split, cut or twist
- Requires little maintenance

Cedarway's long-standing reputation for quality craftsmanship and unmatched authenticity has made it one of today's most sought after cedar shake alternatives. Now we are proud to introduce a new addition to the family — Cedarway Long Length.

Finally, homeowners can enjoy the natural elegance of our traditional panel in a single long length profile. This unique design eliminates stacked seams and offers incomparable realism and performance. Plus, it comes with a full line of matching accessories to give you the freedom of unlimited design options.

AUTHENTIC DEPTH OF GRAIN

Patterned directly from real split cedar, these high-performance panels impart a natural handcrafted appearance, with an authentic looking deep grain that shows on the edges.

POPULAR EXTERIOR ACCENTS

No matter the architectural style of your home, Cedarway has the color solution that's right for you in both traditional and hand split profiles.

MAINTENANCE-FREE

Real split cedar is adversely affected by the weather, and requires constant and costly upkeep. Although it looks virtually identical to real split cedar, Cedarway is designed to withstand the elements. It won't crack, warp, rot, split, cut or twist, providing years of beauty and performance with little or no maintenance.

LONG LENGTH SHAKE

- Features a richly grained, variably textured surface for unmatched realism
- Single 7" profile with 96" (8 ft.) exposure
- 22 panels per 100 sq. ft. of coverage
- Varied space between "shingles" just like real shake; designed to expand and contract without opening or buckling
- Excellent impact strength
- Available in a wide range of popular exterior shades as well as matching accessories for endless design options

ENHANCED PERFORMANCE FEATURES

Each panel is molded with **Secure Lock** reinforced nail slots for optimum holding power in the face of gale force winds.

Special **Accurate Mark temperature lines** molded into the backs of panels help to ensure proper placement in cold weather. This makes installation faster as well as more accurate and precise.

For added stability and extra protection against warping and distortion, **special structural ribs** have been molded into the back of each panel.

A perimeter lock, part of our **True Hold** installation system, creates a seamless look and holds the panels securely together.

The **Easy Lock** system enables panels to be installed under a window or at the end of a wall without tilting.

Weep slots along the bottom edge of the panel help relieve any humidity build-up between the cladding and the wall.

GREEN ATTRIBUTES:

- No VOC's (Volatile Organic Compounds) produced during production, keeping the atmosphere clean.
- Color through design. Having no painted surfaces further protects the environment and increases durability.
- 25-30% less scrap than conventional double course designs. Virtually all Cedarway Long Length siding is placed on the structure, not in the landfill.
- Polypropylene is not a food source for mold or insects and provides a thick barrier to protect the structure.

PREMIUM SPECIFICATIONS
